Subject: RE: request for information about licensing of statistical dataset (2012-based household projections: detailed data for modelling and analytical purposes)
To: housing.statistics@communities.gsi.gov.uk

Hello,

I would appreciate a response to my email of December 3rd below. ONS has indicated DCLG is best positioned to provide a definitive answer. Thank you.

Best regards,

Owen Boswarva

Hi Owen,

With regards to our population estimates then these are re-usable under the OGL. Because this is a DCLG publication and our estimates may have been used purely as a contributing factor in the final projections, it would be best for them to provide you with a definitive answer.

Regards
Tony

Subject: request for information about licensing of statistical dataset (2012-based household projections: detailed data for modelling and analytical purposes)

Hello,

DCLG has recently published an update to the following statistical dataset:

2012-based household projections: detailed data for modelling and analytical purposes

<https://www.gov.uk/government/statistical-data-sets/2012-based-household-projections-detailed-data-for-modelling-and-analytical-purposes>

The spreadsheets available from the above page contain these notes:

1. Estimates are provided in units to facilitate further calculations but they cannot be guaranteed to be as exact as the level of detail implied by these figures.
2. The data are Crown Copyright. They may be reproduced freely within your organisation, but they must not be used for commercial use.
3. Further information on the use of population data and Terms and Conditions of Use can be obtained from ONS – please email pop.info@ons.gov.uk.
4. Further information on the use of household projections data can be obtained from DCLG, please contact housing.statistics@communities.gsi.gov.uk

Most statistics published by either DCLG or ONS are re-usable under the Open Government Licence.

May I ask why this dataset is an exception?

I realise there may be a good reason, such as third-party intellectual property rights in the data. I would appreciate clarification of any reasons or rationale for not publishing this data under the OGL (or under the NCGL, if the dataset is only licensable for non-commercial purposes).

Thank you.

Best regards,

Owen Boswarva
