

Large Raised Reservoirs (AfA134)

Dataset Description

This dataset contains details of Large Raised Reservoirs. The Environment Agency collects and maintains data on all reservoirs designed or capable of holding more than 25,000 cubic metres of water above the natural level of any part of the land adjoining them defined as “large raised reservoirs” under the Reservoirs Act 1975. The register contains detail on the type, physical characteristics, inspection details and information on the reservoir undertaker and Panel Engineer overseeing their operation and maintenance. Under the Water Act 2003 the role of the Reservoirs Act 1975 enforcement authority was transferred to the Environment from Local Authorities in 2004.

Two types of reservoir are maintained within the register:

- Impounding (Dammed); or
- Non-Impounding (Pumped/unimpeded);

Summaries of certificates and reports are also collated and held for each reservoir but are not part of the electronic database.

Price Category: Low

Attribute Name		Attribute Description
Reservoir Name		Name of reservoir
Physical Status		Status of reservoir e.g. In operation
Situation		Nearest locality e.g. Bristol
NGR		National grid reference
Undertaker Name		Individual or organisation that is tasked with the responsibility of managing the reservoir
Undertaker Contact Name and Address	Name	Undertaker Contact Details
	Position	
	Primary Name	
	Secondary Name	
	Street Name	
	Locality	
	Town	
	Post Town	
	County	
Postcode
