

## Flood and Coastal Erosion Risk Management Intermittent Maintenance Programme for England (AfA267)

### Dataset Description

Flood and Coastal Erosion Risk Management Intermittent Maintenance Programme data shows the annual planned work schedules for intermittent maintenance of watercourses and assets, such as channels, raised defences, structures and reservoirs carried out by the Environment Agency to reduce flooding in England.

As this programme is updated annually it will only show the programme for the current year and accordingly cannot be used to identify accurately what work was done historically or more than a year ahead.

Maps show the areas where investment is being made to manage flood and coastal erosion risk. They are not detailed enough to show the impact they may have on individual addresses, which may not always face the same risk of flooding as the areas that surround them.

Funding figures are indicative and any use or interpretation should account for future updates where annual values may change

Flood and Coastal Erosion Risk Management Frequent Maintenance Programme is available under AfA266.

Areas to Benefit from New and Reconditioned Flood Schemes under the Medium Term Plan (2011 – 2016) is available under AfA097.

**Price Category: EA Open Data**

Attribute Name	Attribute Description
SHAPE	Geometry type = Polygon Spatial Reference = British National Grid
GROUP_CODE	Flood Risk Management System Code
FRMS_NAME	Flood Risk Management System Name for the watercourse/asset
CONSEQUENCE	Flood Risk Consequence Rating. Options are: Low, Medium or high as an indication of the degree of severity of the consequence of lack of maintenance.
REGION	Environment Agency Region
FDGIA	Flood Defence Grant in Aid (£k) for this asset
DESCRIPTION	Description of work to be done e.g. obstruction removal, grass cut by hand.
PRIMARY	Primary Activity Main reason for carrying out the maintenance e.g. flood risk, water level management and leisure.
SECONDARY	Secondary Activity Secondary reason for carrying out the work (if any), e.g. flood risk, water level management and leisure.
ASSET_TYPE	Type of Asset e.g. channels, raised defences, structures, reservoirs
ACTIVITY	Activity e.g. repairs, dredging and desilting.
