Hi All,

As promised at the 2nd Environment Agency Data Advisory Group on 16th December, please find attached an updated copy of our National Dataset List. This was last updated on 12th December 2014, there are a few additions to the datasets classified as Open Data for your information.

Thanks,
Debbie.

Hi all,

We promised to share with you our National Dataset List at the EA Data Advisory Group last week.

The National Dataset List is the list of our nationally important datasets, with supporting business information, such as which business area is responsible for the dataset and methods of sharing, based on the best available information.

This is the best information we currently have on Environment Agency datasets, this is what we are working from and we are continually working to refine it.

Note the file is an 'external version' as we have removed names of individuals.

We are issuing this to you under [Open Government Licence](#)

If you have any questions please get in touch,
Thanks,

Deborah Yates National Lead - Data and Information Governance
